

Statewide Oil is committed to undertaking its activities in an environmentally responsible manner and effectively managing any risk that may impact the environment, including the prevention of pollution.

Statewide Oil will comply with all legislative requirements and manage its work activities in a manner that is consistent with the principles of ecologically sustainable development and will deliver continuous improvement in environmental performance.

Statewide Oil will take all steps necessary to ensure that its activities do not compromise this commitment and will establish realistic and measurable targets and objectives that are communicated to all people, monitored for achievement and reviewed on an annual basis.

This Environment Policy receives the highest priority from the senior managers of the organisation and this priority is communicated to all personnel connected with the company.

Managers and Operations Manager / Site Managers are responsible, within their work areas to implement this policy; they must proactively address issues that may affect environmental performance at worksites for which the Statewide Oil are responsible.

All Statewide Oil staff has a responsibility to actively contribute towards avoiding or minimising environmental impacts in their day to day activities. Workers must monitor the continued effective installation and operation of environmental controls within the scope of their day to day work.

All incidents however minor are reported to management so that appropriate action can be undertaken to prevent a repetition or to minimise the risk.

Statewide Oil will reduce and recycle waste materials where possible and dispose of other waste material in a responsible manner.

Statewide Oil undertakes to consult its workers, contractors and clients on environmental matters especially where any workplace change of practice may impact the environment or their obligations
